Bumper for motor vehicle - has mounting brackets integral with rigid beam web section (Ger)

PORSCHE AG F 92.12.04 92DE-4240826 (92.03.31 92DE-4210476)
(93.10.06) B60R 19/02

93.02.11 93EP-102101 R(DE FR GB IT)

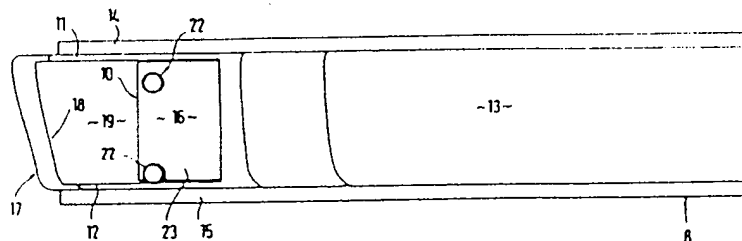

The bumper comprises a rigid beam mounted via brackets on the bodywork.

The brackets (10) are integral with the beam, being typically formed by portions(16) cut out of its web(13) and extending towards the bodywork(2). These can be vertical, and joined to the adjacent flanges of the beam over part of their length, being also bent(23) at the ends and secured detachably by fixing devices(22). They can also be clear of the beam ends(17).

ADVANTAGE - Ease of manufacture. (9pp Dwg.No.3/6)
